SpeedVitals Pro Audits

Prerender Links for Instant Navigations using Speculation Rules API

Recommended: Use Speculation Rules API to Prerender Links.
Alternatively, you can use Flying Pages or instant.page or Quicklink to make a page load in an instant. (This will not improve the page speed scores and will only come into play when a visitor clicks a link after opening your webpage)

Monitor Your Website Performance

Regularly Monitor your website performance to ensure it always stays fast using SpeedVitals Performance Monitoring

Lighthouse Audits

Properly size images - Est savings of 200 KiB

Serve images that are appropriately-sized to save cellular data and improve load time. Learn how to size images

	URL	Resource Size	Est Savings	
	/foliahaz.jpg	81.24 KB	76.29 KB	Convert

	/szamoca.jpg	80.42 KB	74.99 KB	Convert
	/szantofold.jpg	53.66 KB	48.76 KB	Convert

Serve images in next-gen formats - Est savings of 69 KiB

Image formats like WebP and AVIF often provide better compression than PNG or JPEG, which means faster downloads and less data consumption. Learn more about modern image formats

	URL	Resource Size	Est Savings	
	/szantofold.jpg	53.66 KB	25.43 KB	Convert
	/szamoca.jpg	80.42 KB	23.94 KB	Convert
	/foliahaz.jpg	81.24 KB	20.02 KB	Convert

Ask AI

Minimize third-party usage

Third-party code can significantly impact load performance. Limit the number of redundant third-party providers and try to load third-party code after your page has primarily finished loading. Learn how to minimize third-party impact

Largest Contentful Paint image was not lazily loaded

Above-the-fold images that are lazily loaded render later in the page lifecycle, which can delay the largest contentful paint. Learn more about optimal lazy loading

Passed Audits

- Eliminate render-blocking resources
- Defer offscreen images
- Minify CSS
- Minify JavaScript
- Reduce unused CSS
- Reduce unused JavaScript
- Efficiently encode images
- Enable text compression
- Preconnect to required origins
- Initial server response time was short - Root document took 40 ms
- Avoid multiple page redirects
- Use HTTP/2
- Use video formats for animated content
- Remove duplicate modules in JavaScript bundles
- Avoid serving legacy JavaScript to modern browsers
- Preload Largest Contentful Paint image
- JavaScript execution time
- Minimizes main-thread work
- Uses efficient cache policy on static assets

Avoid long main-thread tasks

Avoids an excessive DOM size

Avoids enormous network payloads
